Sub-Audible Tone Automation Information

Sub-Audible cue tones, for use with automation control, are provided on Learfield IMG College's Internet Streaming Networks. If your station intends to use this method of cue tone automation, a "Tone Decoder" device is required. A couple of brands and models of decoders are available from many equipment suppliers.

Please refer to the table below for proper cue assignment on the desired network(s).

Learfield IMG College Sports Networks via "CCBD" Streaming	25 Hz Tone = Local Break Start 35 Hz Tone = Legal ID Break (:10 sec) 25/35 Hz Combined Tone = End of Broadcast
--	--

For a "Test" of the Sub-Audible cue signaling system, or if you need technical assistance to answer any questions, please call our Learfield IMG College Engineering hotline at 573-893-1955.
